Forecast for Tuesday 08 Aug 2023

Weather: A very cloudy day with low cloud and hill fog throughout much of the day. Drizzle rain will persist throughout the morning until mid-afternoon. Later the rain will turn patchier but there remains a risk of heavy bursts developing in any sunny spells. Drying up overnight.

Chance of cloud-free hill tops above 600m: Less than 10% becoming 100% by late evening.

Low cloud and visibility: Cloud bases around 200-500m for much of the day and persistent drizzly rain, brining poor visibility. Cloud cover will become patchier through the evening, brining improvements for some northern areas of the beacons before dark.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Low cloud and persistent drizzle will make for poor visibility and walking conditions. Cloud may lift throughout the afternoon and into the evening to bring a limited improvement, though there is some uncertainty in the timing of this.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 07 Aug 2023	0mm	0.2mm	16mm

Forecast for Wednesday 09 Aug 2023

Weather: A fine start to the day, but turning cloudier from the west throughout the afternoon with a risk of some drizzly rain on the highest hills. Feeling much warmer than Tuesday and still quite bright despite the cloud cover.

Maximum wind: Southwesterly12mph gusting 20mph.

Chance of cloud-free hill tops above 600m: 100% becoming 60% in the east and less than 10% in the west by mid-afternoon.

Low cloud and visibility: No cloud cover first thing, cloud with bases around 500m will arrive from the west throughout the morning and into the afternoon, brining poor visibility to the highest hills in the west, this cloud will be thick enough for some drizzly rain at times.

Temperature: **Valleys:** 22 Celsius.
At 600m: 15 Celsius.
Freezing level: Above the summits
